

```

/*****
Genesis Grant
CTEC 120 Classwork 1 Week 2;
Prompt the user for their First Name, Last Name, Age,
Height, and expected grade in this class. :-)
*****/

```

```

//Import scanner class
import java.util.Scanner;

public class Main
{
    //This is where global variables should be declared and initialized.

    //This statement declares my object input and inputs stream System.in
    static Scanner input = new Scanner(System.in);

    public static void main(String[] args) {

        //Declare variables
        String firstName;
        String lastName;
        int age;
        double height;
        char expectedGrade;

        //Prompt user for values and use appropriate methods
    }
}

```

```
System.out.println("Please enter your first name: ");  
firstName = input.next();
```

```
System.out.println("Please enter your last name: ");  
lastName = input.next();
```

```
System.out.println("Please enter your age: ");  
age = input.nextInt();
```

```
System.out.println("Please enter your height: ");  
height = input.nextDouble();
```

```
System.out.println("Lastly, what grade do you expect to get in this class: ");  
expectedGrade = input.next().charAt(0);
```

```
System.out.println("Your first and last name is " + firstName + " " + lastName);  
System.out.println("You are " + age + " years old.");  
System.out.println("Your height is " + height);  
System.out.println("You expect to get a " + expectedGrade + " in this class.");
```

```
System.out.println("Thank you for using this program! :-) ");
```

```
}
```

```
}
```
